

1715

Headphone Demonstrator

## Serious Power for Serious Headphone Shoppers

Designed with the output power to effectively demonstrate today's high-end headphones, the 1715 amplifier from Audio Authority® makes it possible to present the serious listener with a full demonstration of each headphone's true capabilities. Ideal when combined with our uncompressed audio player, Model 1703.

The 1715 amplifier devotes its output to one selected pair of headphones at any one time to ensure optimal performance. It delivers analog audio signals with pristine clarity and smooth frequency response. The installer can adjust the gain to suit the output level appropriate to the sensitivity of the headphones on display.

## Demo System Features:

- Ultra high performance headphone amplification
- Smooth frequency response 12Hz -23kHz (+/- 0.5dB)
- Demo four headphones (expands to 8, 12 or more)
- Select a headphone position via push-button
- Visual Volume™ control knob (optional)
- Timeout adjustable from 15 seconds to 2 minutes
- TheftAlert™ senses headphones via the audio cable and triggers an alarm if they are removed. This feature may be activated per product position.

## SPECIFICATIONS

Power (@ 1% THD+N, 1kHz)	400 mW into 32 ohms	Minimum Load Impedance	8 ohms
Frequency Response	12Hz -23kHz (+/- 0.5dB)	Power Input Connector	5.5 X 2.1mm
S/N Ratio	96dB	Input Voltage/Polarity	12VDC center positive
THD+N @ 1VRMS, 1 kHz	0.07%	Max Input Current	160mA
Input Impedance	10K ohms	Power Supply	571-013
