Audio Authority®

Push-Buttons
For Product Demonstration

The Universal User Interface

Audio Authority® push-buttons provide an attractive, simple interface for demonstration systems. The LED indicator invites customers to select products and adjust volume or select music tracks. 2-wire or 4-wire button harnesses with connectors are compatible with Audio Authority demo systems. The push-buttons connect to all Audio Authority switching systems with cables available in several lengths. Ask about available button colors.

Features:

• Easy installation
• Tough construction for years of performance
• Bright LED illumination, available in several colors
• Optional Molex disconnect cable

Button Styles (Actual Size)
