# Touch Panels for Retail Demonstrations

The Audio Authority® TouchSelect™ series offers flexible solutions to any interactive challenge - product activation, play/pause, volume control, or multiple track choices. These panels can be linked together with standard Cat 5 cables, and connected to a variety of compatible modules to create a complete demo system. Our video and audio players, switchers, and amplifiers can be integrated with third party devices to solve your demo challenge, with custom graphics that make your display attractive and interactive.

## Features

- Use only the locations you need.
- Use any non-conductive material for graphic overlay.
- Bright blue LEDs shine through many overlay materials.
- Each touch position can be programmed.
- Custom layout available on request.
